

Research & Development Institute

Venue: Derbyshire

Products: Halo, Hive, Kala, Tryst

Halo, Kala, Tryst

Opportunity

Within a Research & Development institute in Derbyshire, an increase in restaurant capacity was required without extending the footprint of the area. Additionally, a comfortable and inviting client business waiting area was required with a quick turn around a-must, especially within the eating area of the building.

Solution

Greens and greys introduce a biophilic feel to both the restaurant and waiting area. A combination of Tryst consoles and Tryst sofas create private and social areas within the waiting room, with a group of Kala's encouraging a chatty and informal meeting environment. Hive has been used within the canteen for luxury seating whilst also increasing the maximum limit without increasing the footprint.

Outcome

"The initial design was to reflect bringing the outside in as the location in Derbyshire is the world famous World Heritage site of the Derbyshire Peak District. We feel this has been achieved and the environment is totally sympathetic to its surrounding. This creates a place for relaxing, reflection but upmost agility to be used not just as a café but also a meeting area."
