Opportunity

Royal Manchester Children's Hospital wanted to create a more welcoming, friendly & fun environment for children & families in the Oncology and Haematology Outpatients Department. The aim was to revitalise the whole ward to be less intimidating and daunting for younger patients whilst turning it from a generic hospital to a more family friendly experience which was 'out of this world'.

Solution

An alien spaceship aesthetic was carried throughout the refurbished ward with our furniture selected to enhance this experience & match the out of space theme.

Outcome

"A variety of seating was chosen, ranging from modular waving sofas which created a space where the children could sit together or with their families, to more individual and private sofas in the treatment area. We were delighted to be involved in a project that will help to turn a daunting experience into a slightly easier one for the patients."
