Marks & Clerk

Project

Opportunity

Having outgrown their previous workspace, Marks and Clerk, the international group of intellectual property service providers, needed a timeless new office. They commissioned Oktra to create a sophisticated flexible workspace that could hold events and encourage connectivity. The design also needed to subtly reflect the Marks and Clerk brand.

Project

Solution

Throughout the new workspace, pops of colour nod to Marks and Clerk's brand identity. The new front-of-house area, communal space and lounge area have been designed to inspire collaboration and connectivity.

A row of **Dixi** high back chairs upholstered in dark orange with contrast grey cushions provide striking and comfortable seating against a neutral palette of grey, timber and stone.

Pear lounge chairs with elegant black bases were placed in a recess, providing an eye-catching waiting or breakout space. **Centro** benches and stools with **Omni** oak coffee tables, create an inspiring collaboration and breakout zone set against a stunning glass wall.
