MAN Energy Solutions

Project

Opportunity

MAN Energy Solutions SE/Augsburg recently moved into their reconstructed floor in the company's administration building. The consulting and planning agency Dr. Wagner & Partners were responsible for the detailed planning and its realisation supported by the furniture procurement through WINI Büromöbel.

MAN Energy Solutions

Project

Solution

A complete makeover of the technical and structural conditions was undertaken to create a contemporary office design. Recreation areas, communications zones and shared desks, separated by glass walls to create a transparent and open working atmosphere. Long window fronts provide a generous amount of daylight.

The spacious project room was created as a flexible and creative work lab. A bistro kitchen furnished with **Swoosh** poseur stools and **Rollie** lounge chairs invites for communication outside break times enabling more fluid collaboration across company.

Back-to-back **Cubbi** modules were specific in MAN branded colours and added to create small alcoves in the open plan area, providing privacy away from casual seating areas & sociable spaces.

Tryst booths integrated with power & presentation facilities were provided to support team working and break out facilities away from a traditional meeting room.
